FEDORA 10 & SLACKWARE 12.2

This issue's DVD brings you two great distros on one disc. *Fedora 10*, the latest release of the Red Hat-sponsored project, in-

cludes better wireless networking, improved printer support, and a new security audit system. *Slackware 12.2*, the favorite of veteran admins, is known for stability, simplicity, and a Unix look and feel.

DOUBLE-SIDED DVD

This DVD is a double-sided disc. A DVD device always reads the side of the disc that is facing down. This DVD is labeled like a normal DVD – the label you see as you place the disk into the tray applies to the data on the opposite side.
