3 Domain-Driven Design

With Naked Objects, an open source Java framework, developers write core domain classes and get working software. Haywood shows you how to write and test domain applications, then how to deploy your applications onto Naked Objects or conventional frameworks. With domain-driven design, you'll be able to focus on what's really important.

Domain-Driven Design Using Naked Objects

Dan Haywood

4 JasperReports 3.5

Written by the Chief Technology Officer of Ensende Technology, LLC, this book explains how to use JasperReports, an open source Java reporting library, to create clear, powerful reports from haphazard data. With JasperReports, you can add charts and graphs, integrate data from other apps, and export your data in various file formats.

JasperReports 3.5 for Java Developers
