- **PCLinuxOS 2007** - the standard PC-LinuxOS release, with KDE and a well-integrated collection of games, office applications, and system utilities.
 - **PCLinuxOS "MiniME" 2008** - an ultralight version of PCLinuxOS designed for maximum customization.
 - **PCLinuxOS Gnome 2.12.2** - a special version that replaces the default KDE desktop with Gnome 2.21.
 - **Sam Linux 2007** - a PCLinuxOS variant with the Xfce 4.4 desktop and a number of important extras, including Wine, Java, Beryl/XGL, and support for more than 20 languages.
- Boot to any system from the DVD. If you decide you like what you see, you can install PCLinuxOS directly on your hard drive.

What's Inside

The PCLinuxOS versions included on this DVD are free software without proprietary components. PCLinuxOS is based on Mandriva and includes many of Mandriva's configuration and management tools. You'll also discover a rich collection of multimedia tools and office applications.

Try It!

This month's DVD comes with four versions of the popular and versatile PCLinuxOS. Use the custom boot menu to choose the version that works for you. Or try them all - the handy Live format lets you sample each version before installing on your hard drive. We hope you enjoy this month's Linux Magazine PCLinuxOS DVD.
