Mandriva Linux Free 2010.2

The popular Mandriva Linux is known for an appealing desktop experience and a powerful collection of management tools. According to Mandriva, the latest version offers faster startup, a smarter desktop, and many other enhancements. Choose either the Gnome 2.30 or KDE 4.4.3 desktop, and configure your system with Mandriva's versatile Control Center.

Note: This DVD does not include a Live boot option. To install Mandriva 2010.2, insert the disc into the DVD drive and restart your computer. Be sure your system is configured for DVD boot. Before you install, make sure you have sufficient free space or be prepared to delete a partition. The default option in the boot menu launches a hard disk installation automatically. As always when installing a new operating system, be sure to back up any critical files before using this DVD. See the Mandriva documentation [3] for more on installing Mandriva 2010.2.
